**Non-GAAP Financial Measures:** Constant-currency revenue change is a non-GAAP financial measure that removes the impact of fluctuations in foreigncurrency exchange rates, thereby facilitating period-to-period comparisons of the company's performance. It is calculated by translating the current period's revenue at the same average exchange rates in effect during the applicable prior-year period and then comparing that amount to the prior-year period's revenue. The company believes that constant-currency revenue change is useful to investors, lenders and analysts because such information enables them to gauge the impact of foreign-currency fluctuations on the company's revenue from period to period.
